

ADITYA CHAUHAN

Full Stack Developer | Vadodara, Gujarat, India
chauhanaditya072@gmail.com | 9638985433 | github.com/aditya072690 | linkedin.com/in/aditya07269

TECHNICAL SKILLS

Languages:	Python, JavaScript, TypeScript, Swift, Java, Dart, C/C++
Frontend:	React, React Native, Next.js, Redux, HTML5, CSS3, Tailwind CSS, Material UI, Flutter
Backend:	Django 5.1, Django REST Framework, Celery, RabbitMQ, Node.js, Express.js, .NET, REST APIs, API Design, OAuth 2.0, Webhooks, Authentication & Authorization (JWT, RBAC)
Database:	PostgreSQL, MongoDB, Supabase, Firebase, Database Design & Optimization
Cloud/DevOps:	AWS EC2, AWS S3, AWS API Gateway, Docker, Git, GitHub, CI/CD (GitHub Actions)
Tools & Practices:	Postman, Figma, Agile Development, Performance Optimization, Mobile-First Development, Code Reviews

EDUCATION

BTech, Computer Science and Engineering — Navrachana University, Vadodara | 2020 – 2024

EXPERIENCE

Software Developer — Oneknotone Technologies January 2024 – Present

OKO Home Multi-Role Dashboard

- Built a multi-role dashboard frontend with React.js, Next.js, and TypeScript, enabling role-based access control for 3+ user types
- Built backend REST APIs with Node.js and .NET, adding JWT authentication and input validation to secure endpoints
- Optimized React rendering with React.memo, useMemo, and useCallback, improving performance by 40% and supporting 500+ concurrent users

VR & Flutter App Integration

- Built immersive 3D virtual environments in C++ with Unreal Engine, adding FPS navigation, camera controls, and object interaction
- Added auto-play functionality to VR tours, automating walkthroughs of virtual spaces
- Built a Flutter app with real-time data sync, propagating live state changes from the app to the VR system
- Implemented WebSocket-based communication, enabling real-time mobile-VR interaction through an event-driven architecture

Database & Performance Optimization

- Optimized database queries through indexing and JOIN tuning, cutting response times by 90% and adding pagination for large datasets
- Managed schema migrations with version control, shipping database design changes across 5+ production deployments

Development & Deployment

- Ran Git-based workflows with code reviews, pull requests, and Docker containerization, inside Agile sprint planning and retrospectives

PROJECTS

SyncHub — Multi-Platform E-Commerce Synchronization Engine

Django & Celery | github.com/aditya072690/SyncHub

- Built a Django 5.1 + Django REST Framework backend to sync Shopify, WooCommerce, and Amazon SP-API via OAuth 2.0, REST APIs, and webhooks
- Engineered an async task pipeline with Celery 5.x + RabbitMQ, adding dead-letter handling, exponential backoff with jitter, and automatic retries for platform API failures
- Implemented concurrency-safe inventory management with PostgreSQL row-level locking (select_for_update) and transaction atomicity, preventing lost updates and overselling
- Engineered unified webhook ingestion with per-platform signature verification (Shopify/WooCommerce HMAC-SHA256, AWS SNS) and event deduplication, achieving under 2ms webhook acknowledgment
- Built a cross-platform conflict resolution system with configurable Source of Truth, enabling automated resolution and human review for manual overrides
- Implemented Fernet encryption (AES-128-CBC + HMAC-SHA256) for OAuth tokens and webhook secrets at rest, and built a Django admin interface for integration and sync monitoring

AssessFlow — Full Stack Assessment Platform

assess-flow-pearl.vercel.app

- Built AssessFlow, a full-stack assessment and testing platform, with React (Vite) and Tailwind CSS on the frontend, and Node.js, Express, and MongoDB on the backend
- Built question flow, scoring logic, image support, and per-user scoping features
- Secured JWT secrets via environment variables and migrated the project to Tailwind v4

VaultX — Secure Cloud File Storage SaaS Platform

Portfolio Project

- Architected a secure file storage platform with Next.js 14 and React on the frontend, and .NET/Node.js Express on the backend
- Implemented JWT authentication, RBAC, WebSocket real-time features, and file versioning, supporting 500+ concurrent users
- Optimized database queries through strategic indexing, cutting response times by 90% and achieving 99.2% production uptime
- Deployed to Vercel and Railway with a GitHub Actions CI/CD pipeline, using AWS S3 for cloud storage

Geeta Olympiad 2025 — React Native Mobile App (Freelance)

Nov 2025 – Jan 2026 | [Google Play](#) | [Apple App Store](#)

- Designed, built, and deployed a React Native app independently, from architecture through production
- Built authentication, a real-time quiz engine, a leaderboard system, and push notifications using Firebase
- Published and maintained the app on Google Play and the App Store, reaching 6,000+ downloads and a 4.5+ rating

VizSpace — 3D Virtual Tour Platform

Jan 2026 – Apr 2026 | [vizspace.in](#)

- Built a responsive frontend with Next.js and React.js for interactive 3D virtual tours of residential buildings and complexes
- Built backend APIs with .NET and Node.js on AWS EC2, using AWS API Gateway for secure REST endpoints and AWS S3 for media storage
- Implemented authentication and secured API endpoints for real estate builder clients
- Optimized production performance, achieving under 2s page load times on desktop and mobile

Learn Geeta — React Native Mobile App (Freelance)

Sep 2025 – Nov 2025 | [Google Play](#) | [Apple App Store](#)

- Implemented OTP authentication, Firebase integration, and a push notification system, supporting 5,000+ active users
- Built REST API integrations and managed production deployments with post-release optimization for iOS and Android

Atmos Farms — Next.js Website

Oct 2025 – Nov 2025 | [atmosfarms.com](#)

- Built and deployed a responsive Next.js website to production
- Optimized mobile responsiveness and page load performance, achieving a 90+ Lighthouse score
